**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 5, line 3, replace " naphtoquinonediazide" with - - naphthoquinonediazide- - to correct a typographical error.

Claim 6, line 4 replace " naphtoquinonediazide" with - - naphthoquinonediazide- - to correct a typographical error.

**REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following;

1. (Original) A hydroxypolyamide having a structure represented by the general formula (1):

wherein m and n are integers satisfying  $m > 0$ ,  $n \geq 0$ ,  $2 \leq m+n \leq 1,000$ , and  $0.05 \leq m/(m+n) \leq 1$ , and the recurring units may be arranged blockwise or randomly; X represents at least one tetravalent organic group selected from groups represented by the following formula (2); Y represents 5-aminoisophthalic acid having at least one hydrogen atom of the amino group substituted, from which a carboxylic acid group is excluded; and Z represents at least one divalent group selected from groups represented by the following formula (4),

wherein  $X_1$  represents a divalent organic group selected from groups represented by the following formula (5); and the hydrogen atoms on each aromatic ring may be substituted with at least one group selected from the group consisting of a methyl group, an ethyl group, a propyl group, an isopropyl group, a butyl group, an isobutyl group, a t-butyl group, a fluorine atom, and a trifluoromethyl group,

wherein R<sub>8</sub> represents a monovalent organic group; X<sub>1</sub> represents a divalent organic group selected from groups represented by the following formula (5); and the hydrogen atoms on each aromatic ring may be substituted with at least one group selected from the group consisting of a methyl group, an ethyl group, a propyl group, an isopropyl group, a butyl group, an isobutyl group, a t-butyl group, a fluorine atom, and a trifluoromethyl group, and

wherein the hydrogen atoms on each aromatic ring may be substituted with at least one group selected from the group consisting of a methyl group, an ethyl group, a propyl group, an isopropyl group, a butyl group, an isobutyl group, a t-butyl group, a fluorine atom, and a trifluoromethyl group.

None of the prior art references of record disclose the claimed hydroxypolyamide polymer as claimed wherein the dicarboxylic acid used to make the polymer is an aminoisophthalic acid as defined for "Y". The use of that polymer in a resin composition, a process for making a cured relief pattern and a semiconductor device made from the polymer. Each of MUELLER et al (5,077,378), HAMMERSCHMIDT et al (5,486,447), HIRANO et al (6,071,666), WEBER et al (6,177,225) and TAKAHASHI et al (6,376,151) are cited to disclose hydroxypolyamides or polybenzoxazoles precursors, however in each case none of the references disclose or suggest an amino substituted dicarboxylic acid for making the polymer.

RADLMANN et al (3,904,589) is cited to disclose amino containing isophthalic dicarboxylic acids however the diamines used to react with the dicarboxylic acid lack hydroxyl groups.

Because none of the references of record disclose or render obvious the claimed invention, claims 1-10 are seen as allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Chu whose telephone number is (571) 272-1329. The examiner can normally be reached on Monday - Friday from 9:30 am to 6:00 pm.
